

## Offer another cost-saving benefit to Assurant Health Access customers

### → Introducing MinuteClinic® — the walk-in medical clinic inside CVS/pharmacy®

Assurant Health has teamed up with MinuteClinic to make getting healthy more convenient and less expensive. Beginning December 1, 2013, Assurant Health Access customers can visit MinuteClinic to seek care for minor injuries, illnesses and skin conditions—and they'll have access to these office visits at a reduced rate that leaves customers with little or nothing to pay.

- Assurant Health Access **Value** customers will be able to access these services for a \$5 out-of-pocket cost (after the \$50 benefit payment is applied to the \$55 bill)
- Assurant Health Access **Fundamentals** and **Enhanced** customers will be able to access these services for no out-of-pocket cost (after the \$75 benefit payment is applied to the \$55 bill). They may even get money back!

And MinuteClinic will continue to honor this low rate for Assurant Health Access customers no matter how many office visits they have.

For even greater convenience, Assurant Health Access customers may have **lab work**, like a cholesterol test, performed as part of the visit at MinuteClinic with no additional out-of-pocket expense (after the \$15 benefit payment is applied to the \$15 bill). Customers can also take advantage of a **flu shot** for just \$15 (flu shot limited to one per customer, per year).
